

# INTERIOR SYSTEMS WALL & CEILING

---

## CARPENTERS & CONTRACTORS

**Carpenter Contractor Alliance  
of Metropolitan New York**

# WE BUILD NEW YORK

Interior Systems professionals are experts in several facets of a structure's interior. Typical work involves the installation of modern equipment and material in commercial and public buildings including acoustical ceilings, computer-access flooring, metal framing, wall partitions, office furniture systems, and both custom or factory-produced materials. Our specialized skills are brought into play as we assemble complex interior systems using technical data supplied by manufacturers.

Our members are highly skilled, meticulously trained, extremely motivated, and proud. We are the men and women who have built this great city for 100 years. No project is too large or small for us. Our skilled craftspeople continue to prove their worth by tackling the toughest and most complex projects in New York City. We pledge to get **JOBS DONE RIGHT, ON TIME, the FIRST TIME.**

With experience and training, this diverse group of craftspeople hails from all walks of life, race, and gender.

The New York District Council of Carpenters is the parent organization of a number of Carpenter Unions covering the five boroughs and parts of Nassau County:

- Local 20 Staten Island
- Local 45 Queens & Nassau
- Local 157 Manhattan & Bronx
- Local 926 Brooklyn

The NYC District Council of Carpenters and their signatory contractors provide:

## COMPETITIVENESS

We vow to work with our contractor associations to remain competitive in all markets. By working with our industry partners from the Association of Wall-Ceiling & Carpentry Industries of New York and the Building Contractor Association to reach collective bargaining agreements, we solidified our partnerships and continue to work together on projects big and small.

The Association of Wall-Ceiling and Carpentry

Industries of New York and the New York City District Council of Carpenters developed the addendum for residential and hospitality work. One of the key elements to this addendum is the introduction of Journeypersons and Certified Journeypersons. For owners and developers, it lowers the cost and adds a level of competency to the work being done.

## LEADERSHIP

Most of our dedicated supervisors and foremen have risen through the ranks from apprentices to journeyman to foreman. They remember each role they have had and what they took away from each project. More importantly, they know how to motivate the workforce and are dedicated to making every job a success by passing that knowledge on to the next generation of workers.

## PROFESSIONALISM

For 100 years our carpenters and contractors have built the roads, tunnels, bridges, and skyscrapers that make up the beautiful New York City skyline. Our carpenters are ready, willing, and able to build any projects in the NYC area whether it's underground, up in the sky, or over water.

## PRODUCTIVITY

Our member base of highly trained, experienced and motivated craftsmen ensures superior quality of work from commencement through completion.

We work according to a professional attitude, which fuels a work ethic that combines productivity with a commitment to quality.

## RELIABILITY

Our pool of manpower is available for projects of all sizes and schedules. This well-disciplined workforce is part of the most efficient construction crews in the world.

## FLEXIBILITY

Our carpenters are experienced in a wide range of specialties when it comes to Interior Systems, Wall & Ceiling. We are thoroughly adept in:

- General Carpentry
- Gypsum Drywall
- Acoustical Ceilings
- Framing
- Finish Carpentry
- Fireproofing
- Furniture Installation
- Doors and Hardware
- Architectural Exterior Panels
- Heavy Gauge Exterior Framing

Our Carpenters work in every market of construction in New York City. We work on:

- Infrastructure of bridges, roads, and tunnels
- Institutional; colleges, hospitals and schools
- Residential and hospitality
- Stadiums
- New commercial projects
- Commercial renovations
- Retail stores and malls
- Trade shows

## SAFETY

We vow to work with our contractors to ensure every worker goes home every day. We have developed a strict safety training program in conjunction with OSHA and all best practice safety programs offered. We also offer the most intense and up-to-date safety training and technology that creates the safest possible work environment.

## SOLUTION

By using OUR contractors and carpenters, developers and general contractors are guaranteed a workforce that is highly trained and experienced as well as the safest in New York City.

## TRAINING

Our local unions and their contractors partner to offer the highest quality of training and experience in the industry. All employees are required to complete four years of in-depth apprenticeship training. This training includes classroom instruction taught by veteran instructors and onsite experience working with the full spectrum of tools and materials. Experienced members participate in career-long continuing education in a vast array of subjects to stay current with industry technology and advancements. Our training facility also offers extensive safety and health training.

# STEP INSIDE OUR CLASSROOM

## SAFETY

- Safety
- First Aid / CPR
- AED (Automated External Defibrillator)
- Hazard Awareness
- Fall Protection
- OSHA 10 / OSHA 30
- Four Hour Scaffold Certification
- SDS (Safety Data Sheets)
- Tool Safety
- Silica Awareness
- Fire Stop
- Ramset Awareness
- Powered Industrial Truck Operator
- Work Zone Flagger Qualification
- Aerial Lift
- Bloodborne Pathogens

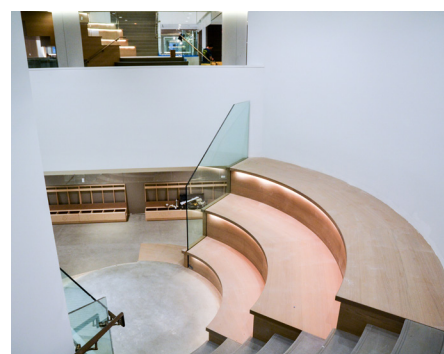

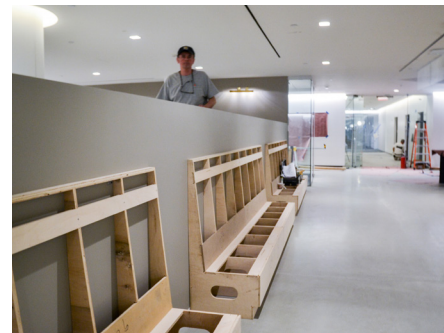

- Ergonomics
- Hazard Communication and Chemical Safety
- 32-Hour Scaffold Erector
- Confined Space
- 40-Hour Rigging and Signaling Certification
- 16-Hour Rigging and Signaling Refresher
- 40-Hour Hazardous Waste
- 8-Hour Hazardous Waste Refresher
- 8-Hour Scaffold Refresher
- LIRR / MTA Track Safety
- Laser Mobile Operations Training
- PanelMaxx Awareness
- 12-Hour Asbestos Allied Trade Restricted Handler
- Burning
- Green Building Awareness

## TRAINING

- Hand Tools
- Drywall
- Ceilings
- Blueprint Reading
- Acoustical Ceilings
- House Framing
- Store Front and Architectural Metal Certification
- Doors & Hardware
- ICRA: Best Practices in Healthcare Construction

## CERTIFICATIONS

- ICRA: Best Practices in Healthcare Construction
- Store Front and Architectural Metal Certification
- 40-Hour Rigging and Signaling Certification
- Shop Steward Certification
- Tradeshow Industry Certification
